

energypedia

Be a light

Energypedia is a wiki platform offering free access to expert information on renewable energy and energy efficiency in developing countries. By sharing your knowledge, experiences and lessons learnt with others, you can help improve energy access all around the world.

Be connected

Engage in discussions and thematic groups in a growing community of practitioners, experts, and other interested stakeholders.

Be part of energypedia

Everyone can read, write, edit, and disseminate articles on energypedia.

Let's work together to create a living platform of knowledge exchange to achieve sustainable energy for all!
